

# “Player Audits”

TAP handicaps are calculated on several weighted categories and include a multitude of matches and associated data entered each week. On any given week, a player may compete at a skill level better or lower than their current rating. Know that because winning or losing matches is only 1 factor, players may go up or down regardless of this outcome.

Complete this form if a player is grossly underrated or overrated (***2 or more skill levels***) and submit it in the league packet or email to [cindy@taplasvegas.com](mailto:cindy@taplasvegas.com). The league office will review, escalate and take action as deemed necessary.

TAP Las Vegas strives to encourage integrity and the best of play for its members by rewarding players for excellence. Players found to be managing their handicaps down will be dealt with on an individual basis and are subject to suspension from the league if this type of behavior is found.
